

LOCK OUT TAG OUT

Instructor	GREG ELSTAD	Phone	763-544-3145
Office	ROUZER SALES, NEW HOPE, MN	E-mail	GREG@ROUZER.COM
Office Hours	M-F 7:30 TO 5:00 P.M.	Time	90 minutes

Speaker:

Greg Elstad has been in the electrical industry for the past 15 years serving distribution, end users, engineers and educational institutions. Greg has provided numerous seminars to the electrical trade including data termination, fire stopping products, electrical test equipment safety, and lock out tag out to name a few. His classes are manufacturer neutral and his interest is offering an entertaining and informative topic for his customers.

Greg Elstad's seminars have received CEU accreditation in South Dakota, North Dakota, and Minnesota.

Description:

This seminar will explore and de-mystify the proper technique in the installation of lock out and tag out products on the jobsite. We will discuss the types of lock out tag out devices that are available and the requirement of a written company policy. Easy to follow steps will be discussed to get started now.

Goals:

Attendees should walk away with a new appreciation and understanding how to properly install and implement a LOTO system. They should be able to now know what to ask for from their suppliers and manufacturer's to make them successful when it comes to the installation and implementation of LOTO products

Requirements:

No requirements necessary from attendees. This class is beneficial of affected and authorized personnel.

Resources:

An informative power point discussing these systems will be provided with photographic samples of some LOTO systems.

Evaluation:

It is the intent of the instructor to provide an informative, current, and entertaining class from which the attendee can gather information to assist him/her in their career.
