Scotch® Super 33+™ "American Legends" Promotion

When two American Legends with a 60-year history of quality, pride and performance get together, exciting things happen. Scotch® brand and NASCAR® have teamed up for the American Legends Celebration. Buy-in is 200 or more assorted rolls of tape (Super 33+™, 35 Colors, Super 88, 3/4" x 66ft only). Orders must be in increments of 100 rolls. For every 100 rolls purchased you will receive 5 t-shirts. For every 1,000 rolls of qualifying tape you will receive the commemorative Nascar/3M barstool for your counter area.

Please Order Today!!!

Greenlee Hand Tool Line Expands

Now Greenlee has done it again, with yet another launch of **nearly 100 additional hand tools**, designed to round out our initial product offering and provide our customers with a comprehensive assortment of the top 200 hand tools used by the professional electrician. Take a look through the pages of the new Greenlee Hand Tool catalog and we think you'll agree - these tools are designed to make your job faster, safer and easier but more than that, these are the tools you'll reach for every day.

Ultra GLIDER™ Cable Pulling Lubrication System

The Greenlee UG5 Ultra GLIDER™ is the "new way" to effectively apply cable lube during cable installation. The Ultra GLIDER™ has several advantages over the manual method used by most contractors today. The UG5 saves labor time—in many cases one person can be eliminated during the job because the same person who controls the feeding of the cable can also control the cable lube application. Cable pulling force is reduced by up to 50% because the lube is applied consistently. It also saves lube cost because it applies lube consistently in a controlled manner .

TRC Power Distribution Center

TRC Power temporary power distribution units have been engineered for ruggedness and utilize the latest in GFCI technology, providing users with a high degree of electrical safety. This equipment is designed to safely distribute temporary power in areas such as construction sites and other jobsite environments either indoors or outdoors. TRC power is also essential for distributing power safely during natural disasters and other emergencies, especially from generators and other temporary power sources. Applications include: Industrial and commercial facilities; entertainment venues; convention centers for exhibitions and trade shows; stadiums for sporting events; photo studio and theatrical applications; on-location radio and television broadcasting; stage and movie productions.

Introducing Wobble Light®

You knock it over. It bounces back. You knock it over. It never gives up. Bright, durable, and virtually indestructible; the 36" tall Wobble Light® is a self righting, highly durable work light that takes a severe beating from workers, vehicles, debris, and drops. Internal ventilation system keeps light cool enough to touch. String them in a series or use individually. No set-up. Just plug it in.

Comments from current users of Wobble Light®:

"We were skeptical of the durability, but we kicked, pushed, dropped, did anything we could think of to break them and they didn't. They're indestructible."

"Doesn't break if it tips over. You can't use halogen lights too long before someone backs into it or trips on the cord and then the bulb and glass break."

BRK SC9120 Series

SC9120B - 120V AC/DC Smoke & CO Combo Alarm

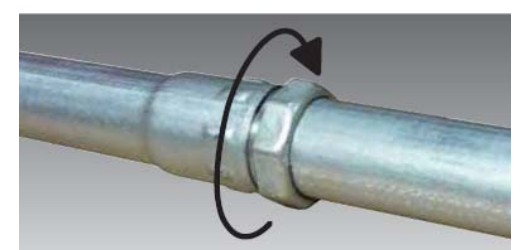

- Single button test/silence
- Latching alarm indicator—remembers which unit initiated an alarm
- Two silence features—can silence the low-battery chirp for up to eight hours or temporarily silence an unwanted nuisance alarm
- Intelligent Sensing Technology™—helps reduce the number of nuisance alarms
- Perfect Mount—allows for easy alignment of alarm

Combination alarms save time and money on installation

Kwik-Fit® Compression EMT - EC&M Category Winner for Product Of The Year

Increase your competitive edge with Kwik-Fit Compression® EMT, the steel EMT that reduces installation time by 50% or more. An ECM Product of the Year 2008 Category Winner. Kwik-Fit Compression EMT features an integrated steel compression coupling, eliminating the need to purchase and store separate couplings. Just insert the plain end into the Kwik-Fit® coupling end and tighten the gland nut. Two simple steps, and your connection is done. The interior of Kwik-Fit Compression EMT is coated with Allied's E-Z Pull® coating, making wire-pulling easier and faster, with lower coefficient of static friction. Make sure your next project has an unfair advantage with Kwik-Fit Compression EMT, part of the Kwik-Fit family of products. Kwik-Fit Compression EMT is UL Listed, patent pending, and available in sizes 2 1/2" through 4".
