RE: Rouzer Group signs to represent MGM Transformer

Effective immediately, Rouzer Group is your official MGM Transformer Representative.

MGM initially started as a dry-type manufacturer but quickly introduced liquid units as well as building an engineering staff that specializes in the application and design of these sophisticated systems with designs for Drive Isolation, Traction Duty, Grounding, Mining, and High-Rise transformers applications.

**About MGM Transformer:**

MGM manufactures transformers ranging 10KVA low voltage to large 10MVA medium voltage units in both dry and liquid configurations. Throughout its 45 years, MGM Transformers has become a brand label partner for some of the largest manufacturers in the world such as Siemens, Cisco, Shell, Rockwell Automation and Toyota.

Recently, they have made many significant inroads supplying transformers to new markets such as motor drive isolation, EV charging, mining, solar power and data power distribution. To do this, MGM has upgraded test facilities to fully test all types of transformers to guarantee their traditional high quality.

Thanks for your business,
