RE: Rouzer Group Signs on New Manufacturer – Magnum Tool & Nitroset

Happy to announce that as of January 1st, 2021, Rouzer Group is your official Magnum Tool and Nitroset Representative. Magnum Tool Corp is a consolidation of several brands that was founded in 1989 primarily serving the Houston TX Market. As the company grew it added innovative professional tools designed for the professional trades contractors. Some of the brands you may be familiar with are [Magnum](#), [Sur-Pro](#), Sur-Vault, [Stilts](#) and [Nitroset](#).

About Magnum Tool:

Magnum Tool/Sur-Pro has received incredible feedback for our Stilts, Material Handling and Utility Carts, Hand Tools and other products that were re-engineered to excel on the roughest construction sites. Material Handling is a big deal to contractors and our innovative design and heavy-duty features make Magnum Tool a preferred choice for any construction jobsite or institutional facility work. Improvements like beefed up wheels, heavy casters, steel frames and powder coat help us continue to innovate and customize and create superior products. [VIEW CATALOG](#)

About Nitroset:

The Nitroset system is a game-changing technology that harnesses the energy of a Nitrogen capsule to drive pins into concrete and steel. This new technology of driving pins without using traditional powder actuated loads (gunpowder) is far superior, less expensive and requires no licensing. Nitroset can also be used in facilities that ban or limit the use of live loads of gunpowder. Nitroset is classified as non-explosive allowing for standard shipping and storage of the capsules and fasteners. The result is a system that stresses operations and environmental safety. Finally, our system is 100% lead free in compliance with OSHA (CFR 1926.62) and no-lead worksite requirements. Nitroset delivers a complete enhanced solution for the fastener industry.
