RE: Rouzer Group – New Manufacturer – Vega Tools

We are very excited to announce that we are now your representatives for Vega Tools in Minnesota, North and South Dakotas, and western Wisconsin! For over 25 years Vega has been producing industry leading driver bits and fastener tools. The benefit of Vega is improved productivity for assembly operations and construction professionals. They have proven to be the most durable fastener driving tools on the market with a relentless focus on quality.

Vega identified a need in contractor supply and industrial distribution for a complete line of fastener-driving tools that matched the high quality and performance of existing fastener-driving tools in North America, but at significant savings for distributors selling to professional end-users and assembly-oriented manufacturing companies. With over 2,000 SKUs, Vega should be your main source of bit driving tools.
